To the late Dr. James D. Finn, my mentor and a forgotten HPT pioneer, who taught me to see systemically with the left side of my brain and always ask the hard questions

To Judy Hale who taught me that you can see however you choose to and has been a friend and colleague for more than 20 years

To Lynn Kearny who taught me to see with the right side of my brain and helped me write in understandable English

To my wife Belinda Silber, who taught me to see with my heart and whose love, acceptance, patience, and support helped me write from that special place

KHS

To my husband, best friend, and lifelong companion, Cress Kearny, who has seen me through the late nights and early mornings without giving up on me

To my friend and mentor, Roger Addison, who has staunchly supported my use of drawings to crystallize HPT concepts

To my friends and colleagues, Walter Ratcliff and Carol Haig, for their unswerving support

To Ken Silber who talked me down out of the trees when I was sure I could never understand a balance sheet or any of that financial stuff
