- “Strengthening the Resilience of the Banking Sector” 405

- stress
 example scenarios 302–303, 305–309
 integrating with model analysis 154–155
 using models to transfer 144–145
- stress testing
 about 8, 255–258, xiv
 of credit migration and Markov view 217–218
 credit risk 299–309
 firmwide scenario analysis and 507–526
 with Macroeconomic Credit Score model 303–305
 with Multifactor model 301–302
 probabilistic 41–43
 regulations for 305n54
 scenario analysis and 142–155
 systematic portfolio 143–144
- structural liquidity planning 441–449
- Structural Model for Corporate Bond Pricing (Merton) 178–179
- subadditive property, of risk measures 79
- Sufi, A. 430
- Supervisory Capital Assessment Program (SCAP) 8, 507
- Swap CVA 336–339, 337n3, 340–342, 357–360
- swap exposure profiles, CVA and 351–360
- Sweeney, R.J. 99, 352
- systematic portfolio stress tests 143–144
- systematic risk 37
- systematic stress test programs, *versus* portfolio sensitivity analysis 147
- systemic view 523–524
- T**
- tail approximation 52–53, 67, 104–110
- Taleb, N.N. 2, 23n1
- Tarullo, D.K. 524
- Tasche, D. 39, 81, 86, 294
- Task Force on Interest Rate Risk (TFIR) 488
- Tavakoli, J. 323
- Tay, A. 125–126
- Taylor, A.M. 99
- Taylor, M.P. 99
- Taylor approximation 24–25, 44
- t*-Copula 193–194, 207–208, 361
- Teräsvirta, T. 103–104
- TFIR (Task Force on Interest Rate Risk) 488
- Thakor, A. 442
- Theil, M. 250
- Thomas, L.C. 243n29
- Through the Cycle (TTC) 194, 277–278
- Tibshirani, R. 79
- tiered execution costs, liquidity hedging with 435–441
- tiered portfolio closeout over time 139–140
- time horizons 415
- time scaling 134–136
- Time Series Forecasting models, use of for line items 522–523
- timeliness, as core principle of risk infrastructure 13–15
- Tirole, J. 430
- Torous, W.N. 418
- traded bonds, economic capital for portfolio of 230–231
- trading, VaR with 134–136
- Traditional Markowitz Efficient Portfolio 156
- tranche 323–324
- transaction costs 474n10
- transparency, as core principle of risk infrastructure 13–15
- trapezoidal rule 44
- treasury-issued credit default swaps 468
- truncated distribution test 126–127
- Tse, Y.K. 133
- Tsui, A. 133
- TTC (Through the Cycle) 194, 277–278
- Turnbull, S. 175n4, 317n61
- U**
- UK FSA 460, 460n16
- Ulmer, A. 53
- unconditional coverage 123–124
- unilateral agreement 368–373
- Univariate Time Series 97–110
- unobserved factor models 61–65
- Uryasev, S. 157, 158
- V**
- valuation, of embedded options 471–473, 475–477
- value, creating from risk management 9–10
- Value at Risk (VaR) 4, 6n2, 7–8, 8n6, 28, 126–127, 134–136
- Van Deventer, D. 473–474, 475–476
- VaR Interval estimation 76–79
- VaR risk contributions
 calculation of 82–84
 smoothing 84–86
- variance reduction 66–69
- Vasicek, O. 222, 239
- Verma, A. 182
- views, of quadratic portfolios 45–47

volatility clustering, capturing 100–104
volatility contributions, to VaR and CVaR
 contributions 34
