PART ONE

The L&D value gap and how to close it

01 The rise of learning analytics 3

Why is all of this important? 6

Standards are coming 7

Data availability 8

Changing the way talent analytics work gets done 9

Providing unique insight into employee behaviour 12

Learning analytics rises 13

Notes 19

02 What is learning analytics? 21

Introduction 21

Learning analytics today: measure for measure, what should be measured? 23

Why measure learning? 25

Most organizations start with the simple: measure training activity and satisfaction 26

Efficiency, effectiveness and business outcomes: closing the learning measurement gap 28

The journey to learning analytics 29

The Four Levels of Evaluation 30

The Return on Investment Methodology 31

Impact Measurement Framework 33

Success Case Method 34

Performance-Based Evaluation 36
Conclusion 44
Notes 46

03 The value-centred learning organization: A new evaluation paradigm 49

Volume is not value 49
We're already delivering value, though... right? 50
Delivering and demonstrating value: the Talent Development Value Framework 52
The Talent Development Value Framework in action 61
Advancing measurement maturity 63
Conclusion 65
Notes 66

PART TWO

Establishing sound measurement practices

04 Aligning L&D's value with the C-suite: The Four Value Drivers and Portfolio Evaluation 71

What the C-suite wants from L&D 71
Connecting L&D with the business strategy 73
The Four Value Drivers 74
Building business alignment 76
Translating value drivers to action: Portfolio Evaluation for L&D 78
Immediate benefits of portfolio alignment 83
Additional benefits: portfolio management 85
Change the conversation 90
Conclusion 91
Notes 91

05 Linking learning to business impact 93

What works? 93
Why does it work? 95
Experimental designs 99
Alternatives to experimental designs 103
Alternative designs: practical ways forward 103

Conclusion 114

Notes 116

06 The new leading indicators of success and how to manage them 118

Your training programmes may not be as good as you think they are 118

Scrap learning and how to reduce it 121

Performance improvement 126

Net promoter score 129

Manager support and how to improve it 131

Predictive Learning Impact Model 2.0: Causal Modelling 140

Conclusion 154

Notes 155

07 Developing a sustainable reporting strategy 156

The role of reporting in learning analytics 156

Getting started: design principles 159

Components of an effective reporting strategy 161

Reporting strategy development 170

Critical success factors 172

Perform gap assessment 175

Implementing the strategy 181

Special cases: dashboards and scorecards 183

Monitor the strategy: success indicators 188

Conclusion 189

Notes 190

08 Technology's role in learning measurement 192

What should technology do? 193

Benefits and costs of learning technologies 194

The requirements for a new technology system in the BI space 200

The challenge of self-reported data 206

What is the ROI of technology systems? 209

Applying principles of business intelligence systems to L&D 210

Additional technologies 215

Conclusion 218

Notes 219

09 Benchmarks 221

Comparison to standards provides insights for decision-making 221

Benchmarking improves maturity 222

Why are benchmarks valuable in the L&D space? 224

What benchmarks are available? 225

Benchmarks and statistical significance 228

What does MTM bring to the market beyond benchmarks? 234

How do clients use benchmarks to support decision-making? 235

Conclusion 237

Notes 237

PART THREE

Refine the strategy: Evolution, ongoing transformation and innovation

10 Driving alignment from strategy through execution 243

Measure twice, cut once 243

The ADDIE Model: sustaining alignment using a cyclical approach 251

Closing the loop 266

Conclusion 268

Notes 269

11 Optimizing investments in learning 271

Learning and development groups struggle to create value 271

Developing a framework 273

Reporting measures to the business 275

Working with business leaders 285

Continuous improvement and management approaches 285

Principles 288

Less is more 289

Assumptions 291

Moving from reporting to action 291

Conclusion 295

Notes 295

12 Measuring informal learning outcomes 297

Introduction 297

What is informal learning? What is social learning? 299

The new learning landscape 300

Learning from the past: e-learning lessons 304

Organizational ecosystem for informal learning 306

Traps, potholes and pitfalls of informal learning 308

Showing value through measurement 311

What should we measure to show value? 312

Use cases 317

Conclusion 320

Notes 321

13 Beyond learning analytics to talent management analytics 324

The future is for those who can predict it 324

Defining what to measure in talent management 325

Understanding the employee life cycle 328

Integrating data 331

Research on talent analytics 331

It's not the analytics that matter: it's how they are applied 337

Managing data in the analytics process 339

Improving analytic impact 341

How companies are addressing the challenge
of talent analytics impact 344

Analytics across the talent life cycle 350

Conclusion 357

Notes 358
