Introduction 1

About This Book	1
What You're Not to Read.....	2
Foolish Assumptions.....	2
How This Book Is Organized	3
Part I: Introducing Managerial Accounting.....	3
Part II: Understanding and Managing Costs	3
Part III: Using Costing Techniques for Decision-Making.....	3
Part IV: Planning and Budgeting	4
Part V: Using Managerial Accounting for Evaluation and Control.....	4
Part VI: The Part of Tens.....	4
Icons Used in This Book	4
Where to Go from Here.....	5

Part 1: Introducing Managerial Accounting 7

Chapter 1: The Role of Managerial Accounting 9

Checking Out What Managerial Accountants Do	10
Analyzing costs	10
Planning and budgeting	11
Evaluating and controlling operations.....	11
Reporting information needed for decisions	12
Understanding Costs.....	12
Defining costs	13
Predicting cost behavior.....	14
Driving overhead	14
Costing jobs and processes.....	15
Distinguishing relevant costs from irrelevant costs	16
Accounting for the Future: Planning and Budgeting.....	17
Analyzing contribution margin	17
Budgeting capital for assets	17
Choosing what to sell	17
Pricing goods.....	18
Setting up a master budget.....	18
Flexing your budget	21
Evaluating and Controlling Operations	21
Allocating responsibility.....	21
Analyzing variances.....	22
Producing a cycle of continuous improvement.....	23

Distinguishing Managerial from Financial Accounting	25
Becoming a Certified Professional	25
Following the code of ethics.....	26
Becoming a certified management accountant.....	27
Becoming a chartered global management accountant	28

Chapter 2: Using Managerial Accounting in Your Business 29

What Business Are You In? Classifying Companies by Their Output	30
Checking out service companies	30
Perusing retailers.....	31
Looking at manufacturers.....	32
Measuring Profits.....	33
Earning revenues	33
Computing cost of sales	34
Incurring operating expenses.....	36
Measuring net income.....	36
Scoring return on sales	37
Considering Efficiency and Productivity.....	38
Distinguishing between efficiency and productivity.....	38
Measuring asset turnover	40
Putting Profitability and Productivity Together: Return on Assets	41

Part 11: Understanding and Managing Costs 43

Chapter 3: Classifying Costs..... 45

Distinguishing Direct from Indirect Manufacturing Costs	46
Costing direct materials and direct labor.....	46
Understanding indirect costs and overhead.....	48
Assessing Conversion Costs	49
Telling the Difference between Product and Period Costs	50
Searching for Incremental Costs	51
Accounting for Opportunity Costs	54
Ignoring Sunk Costs.....	55

Chapter 4: Figuring Cost of Goods Manufactured and Sold 57

Tracking Inventory Flow	58
Dealing with direct materials	59
Investigating work-in-process inventory	59
Getting a handle on finished goods	60
Cracking cost of goods sold	60
Calculating Inventory Flow.....	61
Computing direct materials put into production	61
Determining cost of goods manufactured	63
Computing cost of goods sold.....	65
Preparing a Schedule of Cost of Goods Manufactured.....	66

Chapter 5: Teaching Costs to Behave: Variable and Fixed Costs . . . 69

Predicting How Costs Behave	69
Recognizing how cost drivers affect variable costs	70
Remembering that fixed costs don't change	73
Separating Mixed Costs into Variable and Fixed Components	75
Analyzing accounts	75
Scattergraphing	79
Using the high-low method	82
Fitting a regression	83
Sticking to the Relevant Range	87

Chapter 6: Allocating Overhead 89

Distributing Overhead through Direct Labor Costing	90
Calculating overhead allocation	91
Experimenting with direct labor costing	94
Applying over- and underestimated overhead to cost of goods sold	97
Taking Advantage of Activity-Based Costing for Overhead Allocation	98
Applying the four steps of activity-based costing	100
Finishing up the ABC example	103

Chapter 7: Job Order Costing: Having It Your Way 105

Keeping Records in a Job Order Cost System	106
Getting the records in order	106
Allocating overhead	108
Completing the job order cost sheet	109
Understanding the Accounting for Job Order Costing	110
Purchasing raw materials	111
Paying for direct labor	112
Paying for overhead	112
Requisitioning raw materials	113
Utilizing direct labor	114
Applying overhead	114

Chapter 8: Process Costing: Get In Line 121

Comparing Process Costing and Job Order Costing	122
Keeping Process Costing Books	123
Debiting and crediting	123
Keeping track of costs	124
Moving units through your factory — and through the books	126
Demonstrating Process Costing	127
Buying raw materials	127
Paying for direct labor	127
Incurring overhead	128
Moving raw materials into production	128

Using direct labor	129
Allocating overhead.....	130
Moving goods through the departments	132
Preparing a Cost of Production Report	137
Part 1: Units to account for.....	137
Part 2: Units accounted for	138
Part 3: Costs to account for	141
Part 4: Costs accounted for	142

***Part III: Using Costing Techniques for Decision-Making* 145**

Chapter 9: Straight to the Bottom Line: Examining Contribution Margin147

Computing Contribution Margin	148
Figuring total contribution margin.....	149
Calculating contribution margin per unit	150
Working out contribution margin ratio.....	151
Preparing a Cost-Volume-Profit Analysis.....	151
Drafting a cost-volume-profit graph	152
Trying out the total contribution margin formula.....	154
Practicing the contribution margin per unit formula.....	155
Eyeing the contribution margin ratio formula	156
Generating a Break-Even Analysis	157
Drawing a graph to find the break-even point.....	157
Employing the formula approach	158
Shooting for Target Profit.....	159
Observing Margin of Safety	161
Using a graph to depict margin of safety	161
Making use of formulas	162
Taking Advantage of Operating Leverage	162
Graphing operating leverage.....	162
Looking at the operating leverage formula	163

Chapter 10: Capital Budgeting: Should You Buy That? 165

Identifying Incremental and Opportunity Costs.....	166
Keeping It Simple: The Cash Payback Method	166
Using the cash payback method with equal annual net cash flows	167
Using the cash payback method when annual net cash flows change each year.....	168

It's All in the Timing: The Net Present Value (NPV) Method	169
Calculating time value of money with one payment for one year	170
Finding time value of money with one payment held for two periods or more	171
Calculating NPV with a series of future cash flows	173
Measuring Internal Rate of Return (IRR)	175
Considering Nonquantitative Factors	177

Chapter 11: Reality Check: Making and Selling

More than One Product179

Preparing a Break-Even Analysis with More than One Product	180
Step 1: Computing contribution margin ratio	180
Step 2: Estimating sales mix	182
Step 3: Calculating weighted average contribution margin ratio	182
Step 4: Getting to break-even point	183
Coping with Limited Capacity	184
Deciding When to Outsource Products	186
Eliminating Unprofitable Products	187

Chapter 12: The Price Is Right: Knowing How Much to Charge191

Differentiating Products	192
Taking All Costs into Account with Absorption Costing	192
Pricing at Cost-Plus	193
Computing fixed markups	194
Setting a cost-plus percentage	195
Considering problems with cost-plus pricing	196
Extreme Accounting: Trying Variable-Cost Pricing	197
Working out variable-cost pricing	197
Spotting the hazards of variable-cost pricing	198
Bull's-Eye: Hitting Your Target Cost	199
Calculating your target cost	199
Knowing when to use target costing	201

Chapter 13: Spreading the Wealth with Transfer Prices203

Pinpointing the Importance of Transfer Pricing	204
Negotiating a Transfer Price	206
Finding the selling division's minimum transfer price	207
Setting the purchasing division's maximum transfer price	207
Trying to meet in the middle	208
Managing with full capacity	209

Transferring Goods between Divisions at Cost	210
Setting the transfer price at variable cost	210
Establishing the transfer price at variable cost plus a markup ...	211
Basing transfer price on full cost	212
Positioning Transfer Price at Market Value	214

***Part IV: Planning and Budgeting* 217**

Chapter 14: Master Budgets: Planning for the Future219

Preparing a Manufacturer's Master Budget	220
Obtaining a sales budget	222
Generating a production budget	223
Setting a direct materials budget	224
Working on a direct labor budget	226
Building an overhead budget	227
Adding up the product cost	228
Fashioning a selling and administrative budget	229
Creating a cash budget	230
Constructing a budgeted income statement	234
Applying Master Budgeting to Nonmanufacturers	235
Budgeting a retailer	235
Coordinating a service company's budget	236

Chapter 15: Flexing Your Budget: When Plans Change237

Controlling Your Business	237
Dealing with Budget Variances	238
Implementing a Flexible Budget	239
Separating fixed and variable costs	241
Comparing the flexible budget to actual results	242

***Part V: Using Managerial Accounting for Evaluation and Control* 245**

Chapter 16: Responsibility Accounting247

Linking Strategy with an Organization's Structure	248
Decentralizing	249
Distinguishing controllable costs from noncontrollable costs	250
Identifying Different Kinds of Centers	251
Revenue centers	252
Cost centers	253

Profit centers	254
Investment centers	256
Chapter 17: Variance Analysis: To Tell the Truth	259
Setting Up Standard Costs	260
Establishing direct materials standards	261
Determining direct labor standards	262
Determining the overhead rate	263
Adding up standard cost per unit	264
Understanding Variances	265
Computing direct materials variances	265
Calculating direct labor variances	269
Overhead any good variances lately?	273
Teasing Out Variances	274
Interpreting variances in action	275
Focusing on the big numbers	276
Tracing little numbers back to big problems	276
Chapter 18: The Balanced Scorecard: Reviewing Your Business's Report Card	279
Strategizing for Success: Introducing the Balanced Scorecard	280
Making money: The financial perspective	281
Ensuring your clients are happy: The customer perspective	282
Keeping the clock ticking: The internal business perspective	283
Can your workforce handle it? The learning and growth perspective	285
Measuring the immeasurable	286
Demonstrating the Balanced Scorecard	286
Sketching a strategy that incorporates all four perspectives	287
Identifying measures for the balanced scorecard	288
Chapter 19: Using the Theory of Constraints to Squeeze Out of a Tight Spot.	293
Understanding Constraints	293
Manufacturing constraints	294
Service constraints	295
Managing Processes with the Theory of Constraints	296
Step 1: Identifying system constraints	296
Step 2: Exploiting the constraint	298
Step 3: Subordinating everything to the constraint	298
Step 4: Breaking the constraint	299
Step 5: Returning to Step 1	299

Part VI: The Part of Tens 301**Chapter 20: Ten Key Managerial Accounting Formulas 303**

The Accounting Equation	303
Net Income	304
Cost of Goods Sold	304
Contribution Margin.....	305
Cost-Volume-Profit Analysis.....	306
Break-Even Analysis	307
Price Variance.....	308
Quantity Variance.....	309
Future Value	309
Present Value	310

Chapter 21: Ten Careers in Managerial Accounting 311

Corporate Treasurer	312
Chief Financial Officer.....	312
Corporate Controller.....	312
Accounting Manager	313
Financial Analyst.....	313
Cost Accountant	313
Budget Analyst.....	313
Internal Auditor	314
Fixed-Assets Accountant.....	314
Cash-Management Accountant	314

Chapter 22: Ten Legends of Managerial Accounting 315

Dan Bricklin	315
Cynthia Cooper	316
Sergio Cicero Zapata	316
Eliyahu Goldratt.....	316
Ernest Hauser.....	317
Robert Kaplan	317
Harry Markopoulos	317
Paul Sarbanes and Michael Oxley	318
David Stockman	318
Sherron Watkins	318

Index 319
