

# Contents

<b>Preface</b>	<b>xiii</b>
<b>Acknowledgments</b>	<b>xvii</b>
<b>About the Authors</b>	<b>xix</b>
<b>CHAPTER 1</b>	
<b>Introduction</b>	<b>1</b>
Financial Econometrics at Work	2
The Data Generating Process	5
Applications of Financial Econometrics to Investment Management	6
Key Points	10
<b>CHAPTER 2</b>	
<b>Simple Linear Regression</b>	<b>13</b>
The Role of Correlation	13
Regression Model: Linear Functional Relationship between Two Variables	14
Distributional Assumptions of the Regression Model	16
Estimating the Regression Model	18
Goodness of Fit of the Model	22
Two Applications in Finance	25
Linear Regression of a Nonlinear Relationship	36
Key Points	38
<b>CHAPTER 3</b>	
<b>Multiple Linear Regression</b>	<b>41</b>
The Multiple Linear Regression Model	42
Assumptions of the Multiple Linear Regression Model	43
Estimation of the Model Parameters	43
Designing the Model	45
Diagnostic Check and Model Significance	46
Applications to Finance	51
Key Points	79
	<b>vii</b>

<b>CHAPTER 4</b>		
<b>Building and Testing a Multiple Linear Regression Model</b>		<b>81</b>
The Problem of Multicollinearity		81
Model Building Techniques		84
Testing the Assumptions of the Multiple Linear Regression Model		88
Key Points		100
<b>CHAPTER 5</b>		
<b>Introduction to Time Series Analysis</b>		<b>103</b>
What Is a Time Series?		103
Decomposition of Time Series		104
Representation of Time Series with Difference Equations		108
Application: The Price Process		109
Key Points		113
<b>CHAPTER 6</b>		
<b>Regression Models with Categorical Variables</b>		<b>115</b>
Independent Categorical Variables		116
Dependent Categorical Variables		137
Key Points		140
<b>CHAPTER 7</b>		
<b>Quantile Regressions</b>		<b>143</b>
Limitations of Classical Regression Analysis		144
Parameter Estimation		144
Quantile Regression Process		146
Applications of Quantile Regressions in Finance		148
Key Points		155
<b>CHAPTER 8</b>		
<b>Robust Regressions</b>		<b>157</b>
Robust Estimators of Regressions		158
Illustration: Robustness of the		
Corporate Bond Yield Spread Model		161
Robust Estimation of Covariance and Correlation Matrices		166
Applications		168
Key Points		170
<b>CHAPTER 9</b>		
<b>Autoregressive Moving Average Models</b>		<b>171</b>
Autoregressive Models		172
Moving Average Models		176
Autoregressive Moving Average Models		178

ARMA Modeling to Forecast S&P 500 Weekly Index Returns	181
Vector Autoregressive Models	188
Key Points	189
<b>CHAPTER 10</b>	
<b>Cointegration</b>	<b>191</b>
Stationary and Nonstationary Variables and Cointegration	192
Testing for Cointegration	196
Key Points	211
<b>CHAPTER 11</b>	
<b>Autoregressive Heteroscedasticity Model and Its Variants</b>	<b>213</b>
Estimating and Forecasting Volatility	214
ARCH Behavior	215
GARCH Model	223
What Do ARCH/GARCH Models Represent?	226
Univariate Extensions of GARCH Modeling	226
Estimates of ARCH/GARCH Models	229
Application of GARCH Models to Option Pricing	230
Multivariate Extensions of ARCH/GARCH Modeling	231
Key Points	233
<b>CHAPTER 12</b>	
<b>Factor Analysis and Principal Components Analysis</b>	<b>235</b>
Assumptions of Linear Regression	236
Basic Concepts of Factor Models	237
Assumptions and Categorization of Factor Models	240
Similarities and Differences between	
Factor Models and Linear Regression	241
Properties of Factor Models	242
Estimation of Factor Models	244
Principal Components Analysis	251
Differences between Factor Analysis and PCA	259
Approximate (Large) Factor Models	261
Approximate Factor Models and PCA	263
Key Points	264
<b>CHAPTER 13</b>	
<b>Model Estimation</b>	<b>265</b>
Statistical Estimation and Testing	265
Estimation Methods	267
Least-Squares Estimation Method	268
The Maximum Likelihood Estimation Method	278

Instrumental Variables	283
Method of Moments	284
The M-Estimation Method and M-Estimators	289
Key Points	289
<b>CHAPTER 14</b>	
<b>Model Selection</b>	<b>291</b>
Physics and Economics: Two Ways of Making Science	291
Model Complexity and Sample Size	293
Data Snooping	296
Survivorship Biases and Other Sample Defects	297
Model Risk	300
Model Selection in a Nutshell	301
Key Points	303
<b>CHAPTER 15</b>	
<b>Formulating and Implementing Investment Strategies Using Financial Econometrics</b>	<b>305</b>
The Quantitative Research Process	307
Investment Strategy Process	314
Key Points	318
<b>APPENDIX A</b>	
<b>Descriptive Statistics</b>	<b>321</b>
Basic Data Analysis	321
Measures of Location and Spread	328
Multivariate Variables and Distributions	332
<b>APPENDIX B</b>	
<b>Continuous Probability Distributions Commonly Used in Financial Econometrics</b>	<b>343</b>
Normal Distribution	344
Chi-Square Distribution	347
Student's <i>t</i> -Distribution	349
<i>F</i> -Distribution	352
$\alpha$ -Stable Distribution	353
<b>APPENDIX C</b>	
<b>Inferential Statistics</b>	<b>359</b>
Point Estimators	359
Confidence Intervals	369
Hypothesis Testing	372

<b>APPENDIX D</b>	
<b>Fundamentals of Matrix Algebra</b>	<b>385</b>
Vectors and Matrices Defined	385
Square Matrices	387
Determinants	388
Systems of Linear Equations	389
Linear Independence and Rank	391
Vector and Matrix Operations	391
Eigenvalues and Eigenvectors	396
<b>APPENDIX E</b>	
<b>Model Selection Criterion: AIC and BIC</b>	<b>399</b>
Akaike Information Criterion	400
Bayesian Information Criterion	402
<b>APPENDIX F</b>	
<b>Robust Statistics</b>	<b>405</b>
Robust Statistics Defined	405
Qualitative and Quantitative Robustness	406
Resistant Estimators	406
M-Estimators	408
The Least Median of Squares Estimator	408
The Least Trimmed of Squares Estimator	409
Robust Estimators of the Center	409
Robust Estimators of the Spread	410
Illustration of Robust Statistics	410
<b>Index</b>	<b>413</b>
