

Contents

Preface **xiii**

Acknowledgments **xvii**

Foreword **xix**

Chapter 1: Basic Concepts	1
Introduction	2
Financial Statements	2
The Income Statement	3
The Balance Sheet	10
The Cash Flow Statement	18
Required Revenue for a Given Level of Net Income	24
Case Study: Advanced Solar Systems Corporation	27

Chapter 2: The Envelope Equations	35
Introduction	36
ROCE and NiROCE	36
Net Investments	39
Investment Rate	42
Incorporating the IR and NiROCE into the Expression for Net Income	43
Incorporating IR into the Expression for Cash Flow after Investing Activities	45
NI and CFaIA—A Sequential Year-by-Year Analysis	46
NI and CFaIA—The General Model	49
Estimating Growth Rates of Cash Flow after Investing Activities and Net Income	52
Growth Rate of CFaIAg with Constant IR and NiROCE	52
Growth Rate of Net Income (NIg)	54
Net Income Growth Rate (NIg) with Constant IR and NiROCE	54
Envelope Equations Methodology for Estimating Net Income, Cash Flow after Investing Activities, and Growth Rates	56
Required Revenue Revisited	66
Growing the Net Income	71
Case Study: American Technology Corporation	71

Chapter 3: The Weighted Average Cost of Capital	81
Why Is a Company's Weighted Average Cost of Capital Important?	82
Weighted Average Cost of Capital Defined	83
Operating and Capital Leases	84
Weighting of the Components of Capital Structure	84
Market Value of Debt and Equity	85
Impact of Taxes on the Weighted Average Cost of Capital	87
Estimating the Cost of Debt and Equity and the Capital Asset Pricing Model	88
General Equations for Estimating the WACC for a Company with One Class of Debt and Equity	90
Levered and Unlevered Betas	90
Estimating Beta for Non-Public Companies or Business Units	93
Significance and Uses of the WACC	95
Origin of the Coefficients Used in Calculating a WACC	96
Multiple Hurdle Rates	100
Introduction to Present Value	110
Case Study: Omega Corporation	115
Chapter 4: Introduction to Valuation Models	123
Introduction to Estimating Value	126
Valuation Considerations—Lessons Learned	166
Most Frequently Used Single-Stage Valuation Models	167
Multi-Stage Valuations	167
Equivalence of the Post-Forecast-Period Models	176
Impact of $1/(k - g)$ on the Perpetual Growth Model	180
Considerations of the Terminal Value Multiplier as Implied by the Equivalency Equations	182
Case Study: NexgenSonics and the Power of Discipline!	183
Chapter 5: ROCE and Cash Flow Analytics	195
Introduction	196
Basic Drivers of ROCE	197
Some Practical Aspects of Managing Return on Capital Employed	209
Case Study: Pharos Corporation—The Early Days	210
Chapter 6: Strategies and Best Practices for Managing ROCE and Cash Flow	225
Introduction to Maximizing Return on Capital Employed and Cash Flow	227
Basic Pricing-Driven Models	228
Value-Added Models	230
Introduction to Factors That Impact Corporate Performance	238
Depreciation and Amortization	273
Case Study: Innovative Engineering Corporation	301
Prologue	311

Chapter 7: Productivity and Operating Margin	313
Productivity	314
Incorporating Operating Margin into the Productivity Model	325
Cycle Time	337
Closing Comments on Value Added and Cost	339
Case Study: Laser Technology Inc. Develops Its Productivity Strategy	339
Chapter 8: The Expense Coverage Ratio	353
The Expense Coverage Ratio	354
Expense Coverage Ratio and EBITDA	367
Conclusion	376
Case Study: Safety Solutions Corporation	376
Chapter 9: Debt and Leverage	389
Introduction	391
Debt and Leverage	391
LIBOR and Pricing Loans	391
Debt Financing Alternatives	393
Credit Ratings	395
Relative Cost of Debt Financing	398
Impact of Debt on Return on Capital Employed and Return on Equity	399
Financial Covenants	419
Case Study: Edsson Corporation	424
Chapter 10: Understanding Financial Statements	437
Introduction	439
The Income Statement	440
The Balance Sheet	443
Some Complications	450
The Cash Flow Statement	451
Case Study: Light Technologies Inc.	460
Appendix A: Present Value Models	539
Present Value of Any Stream of Cash Flows	539
Present Value of a Cash Flow E That Takes Place at the End of Year n	540
Present Value of the Terminal Value of a Cash Flow at the End of Year n	541
Present Value of a Stream of Fixed Cash Flows E for n Years	542
Present Value of a Fixed Stream of Cash Flows in Perpetuity ($n = \text{Infinity}$)	544
Single-Stage Growth Models	545
Present Value of a Stream of Cash Flows That Grow at a Fixed Rate for a Finite Period	546
Present Value of a Stream of Cash Flows That Grow at a Fixed Rate in Perpetuity	550

General Equation for Present Value of Single-Stage Cash Flows That Grow at a Fixed Rate	551
Multistage Growth Models	554
Two-Stage Growth Models	555
Three-Stage Growth Models	558
Appendix B: Business Valuation Models	565
Introduction	565
Stream of Distinct Cash Flows	565
Stream of Distinct Cash Flows Followed by a Stream of Perpetual Fixed Cash Flows	566
Stream of Distinct Cash Flows Followed by a Stream of Finite Fixed Cash Flows	567
Stream of Distinct Cash Flows Followed by a Stream of Perpetual Growth Cash Flows	568
Stream of Distinct Cash Flows Followed by a Stream of Finite Growth Cash Flows	569
Stream of Distinct Cash Flows Followed by a Terminal Cash Flow	571
Initial Cash Flow Sequentially Followed by a Finite Period of Cash Flows That Grow at a Fixed Rate g_{FG} and a Terminal Cash Flow	572
Initial Cash Flow Sequentially Followed by a Finite Period of Cash Flows That Grow at a Fixed Rate g_{FG} and a Perpetual Fixed Cash Flow	573
Initial Cash Flow Sequentially Followed by a finite Period of Cash Flows That Grow at a Fixed Rate g_A for N_A Periods and Perpetual Cash Flows That Grow at a Fixed Rate g_{PB}	574
Stream of Cash Flows That Grow at a Fixed Rate g_A for N_A Periods, Followed by a Stream of Cash Flows That Grow at a Fixed Rate g_B for N_B Periods, and a Stream of Perpetual Growth Cash Flows That Grow at a Fixed Rate g_C	575
Appendix C: Growth Models	577
Introduction	577
General Compound Annual Growth Rate Model	577
General Expression for CFaIa g , the Growth Rate of CFaIA	579
General Expression for NI g , the Growth Rate of NI	580
Appendix D: General Equations for Estimating NI and CFaIA	583
Introduction	583
ROCE and NIROCE	583
The General Case for the Envelope Equations	585
Special Case: Constant Investment Rate and Net Income Return on Capital Employed	589
Special Case: Focus on Operational Cash Flows	590
Net Income and Cash Flow Growth Equations	592

Appendix E: R&D Growth and Investment Equation	593
Introduction	593
Generational Cost Factor	593
Product Life Cycle	594
Developing an Expression for the Cost of the Next Generation	595
Lifetime Revenue Factor	596
Growth Rates and Product Life Cycles That Satisfy the Requirement $I_{Current} = I_{Next}$	599
Appendix F: Inventory Considerations and the EOQ Model	601
Introduction	601
Components of Inventory Costs	601
Economic Order Quantity	606
Shortage Costs	607
Selected References	611
About the Author	613
Index	615
