

Table of Contents

Preface	xiii
Foreword	xv
Chapter 1	
Introduction	1
Chapter 2	
Genesis of the Institution	9
2.1. Introduction	9
2.2. Open Source Software: Early Developments and Evolution	10
2.2.1. Property Domains	10
2.2.2. 'Opening' of Software 'Freedom'	17
2.2.3. Defining Open Source Software	22
2.3. Conclusion	26
Chapter 3	
The Legal Governance Structure	29
3.1. Introduction	29
3.2. Legal Governance Structure of Open Source Software	30
3.2.1. Existing Intellectual Property Protection and Open Source Software	31
3.2.1.1. Trade Secret Protection	32
3.2.1.2. Copyright Protection	33
3.2.1.3. Moral Rights	37
3.2.1.4. Patent Protection	39
3.2.1.5. Trademarks	43
3.2.2. Existing Contractual-License Protection and Open Source Software	44
3.3. Conclusion	46

Chapter 4	
The Licensing Regime	47
4.1. Introduction	47
4.2. A Taxonomy of Licenses	48
4.2.1. GNU General Public License (GPL) and Other Related Licenses	51
4.2.2. The Berkeley Software Distribution (BSD) and Other Related Licenses	54
4.2.3. The Mozilla Public License and Related Commercial Licenses	56
4.2.4. Other Open Source Software Licenses	59
4.3. Conclusion	60
Chapter 5	
Licensing and Rights Management	61
5.1. Introduction	61
5.2. Groundwork Definitions	62
5.3. The Granting Clause	64
5.3.1. Intellectual Property Grant	65
5.3.1.1. Copyright Grant	65
5.3.1.2. Patent Grant	70
5.3.1.3. Trademarks Grant	75
5.3.2. Other Aspects of the Granting Clause	77
5.3.2.1. Character	77
5.3.2.2. Sublicensing	78
5.3.2.3. Territorial Extent	79
5.4. Exclusions, Term, Revocation and Termination	80
5.4.1. Exclusions from the Granting Clause	80
5.4.2. Term	81
5.4.3. Revocation of License	82
5.4.4. Termination Issues	84
5.5. Conclusion	88
Chapter 6	
Improvements Management: Licensing and Copyright Law	89
6.1. Introduction	89
6.2. Copyleft and Infectious Terms	90
6.3. Copyleft Triggers	95
6.3.1. Modification	96
6.3.2. Aggregation and Compilation	105
6.3.3. Distribution	108
6.4. Technical Issues and Scope of Infection	114
6.4.1. System Libraries	116
6.4.2. Kernel Modules	119
6.4.3. Source Code Editors and Compilers	120
6.5. Conclusion	121

Chapter 7	
Improvements Management: Patent Law	123
7.1. Introduction	123
7.2. Patents: Angst and Agenda	124
7.2.1. Protection against Patents	126
7.2.2. Patent Retaliation/ Peace Provision	128
7.2.3. 'Knowing Reliance' and Downstream Users	130
7.2.4. Cross-License Restriction	132
7.3. Conclusion	135
Chapter 8	
The Case for Interoperability	137
8.1. Introduction	137
8.2. The Interoperability Scenario: Angst	140
8.2.1. Technological Protection Measures	140
8.2.2. Trusted Computing	141
8.2.3. Technological Tweaking	145
8.2.4. Law and Reverse Engineering	147
8.2.5. Contract and License Restrictions	154
8.3. The Interoperability Scenario: Agenda	156
8.3.1. GPLv3 License Provision	156
8.3.2. Patents and Interoperability	161
8.4. Conclusion	162
Chapter 9	
Challenges: Issues in Law	163
9.1. Introduction	163
9.2. Principle of Exhaustion	163
9.2.1. Principle of Exhaustion under Copyright Law	163
9.2.1.1. U.S.A.	164
9.2.1.2. E.U.	166
9.2.2. Principle of Exhaustion under Patent Law	169
9.3. The Unclean Hands Defence	170
9.4. The Misuse Doctrine	170
9.4.1. The Patent Misuse Doctrine	171
9.4.2. The Copyright Misuse Doctrine	173
9.4.2.1. U.S.A.	173
9.4.2.2. E.U.	176
9.5. Implied License	178
9.6. Conclusion	181
Chapter 10	
Challenges: Issues in Licensing	183
10.1. Introduction	183
10.2. Project Management	183

10.2.1.	License Proliferation	184
10.2.2.	Compatibility of Licenses	186
10.2.3.	Centralization	189
10.2.4.	Standardization of Licenses	193
10.3.	Internationalization Challenges	194
10.3.1.	Internationalization and Copyright Law	195
10.3.2.	Internationalization and Patent Law	197
10.3.3.	Internationalization and Licensing Law	198
10.3.4.	Responsive Change and Evolution	200
10.4.	Contract-License Law Issues	202
10.4.1.	Contract as a Foundation for Open Source Software	204
10.4.1.1.	Offer	205
10.4.1.2.	Acceptance	207
10.4.1.3.	Consideration	209
10.4.1.4.	Privity	211
10.4.2.	License as a Foundation for Open Source Software	212
10.4.3.	Dual Solution: License Contract	214
10.5.	Conclusion	219
Chapter 11		
Commercialization		221
11.1.	Introduction	221
11.2.	Freedom, Not Price	222
11.3.	Facets of Commercialization	226
11.3.1.	Arms-Length Commercialization	226
11.3.2.	Symbiotic Commercialization	229
11.3.3.	Integrative Commercialization	230
11.3.3.1.	Layering	230
11.3.3.2.	Multi-Licensing	231
11.4.	Open Source Software: Procurement and Deployment	232
11.4.1.	Case Study: India	236
11.5.	Conclusion	240
Chapter 12		
Software Protection: The Sui Generis Option		243
12.1.	Introduction	243
12.2.	Legal Protection of Software	244
12.3.	Need of a Sui Generis Regime	250
12.3.1.	The Software Industry	251
12.3.2.	Legal Protection of Software	254
12.3.2.1.	Copyright Law Issues	254
12.3.2.2.	Patent Law Issues	255
12.3.2.3.	Diversified Protection Regime	257

12.3.3.	Evolving Landscape of Technology-Law Interaction	259
12.3.4.	Legal Recognition of Protection for Evolving Technological Arenas	260
12.3.5.	International Harmonization of Laws	262
12.4.	Evolving Property Rights Jurisprudence in Context of Software	263
12.5.	Conclusion	269
Chapter 13		
Software Protection: Revisiting the Sui Generis Option		271
13.1.	Introduction	271
13.2.	Proposal for a Model Software Law	272
13.2.1.	Conditions for Grant of Protection	273
13.2.1.1.	Originality-Novelty Balance	274
13.2.1.2.	Technical Advance	276
13.2.1.3.	Utility	277
13.2.1.4.	Developing an Incremental Range	278
13.2.2.	Scope of Protection: General	278
13.2.3.	Scope of Protection: Incremental Innovation	280
13.2.4.	Duration of Protection	285
13.2.5.	Grant of Rights	290
13.2.6.	Limitations on Exclusive Rights	295
13.2.7.	Negotiated Licenses and Compulsory Licensing	298
13.2.8.	Infringement	301
13.2.9.	Remedies	303
13.2.10.	Dispute Resolution	304
13.2.11.	Administrative Procedure	304
13.3.	Conclusion	306
Appendices		309
Appendix I:	GNU General Public License, v2	311
Appendix II:	GNU General Public License, v3	319
Appendix III:	The BSD License	333
Appendix IV:	Mozilla Public License, v1.1	335
Appendix V:	The Open Software License 3.0	345
Bibliography		349
Index		379
