

BRIEF CONTENTS

About the authors xi

Preface xii

PART 1 Management accounting and cost management 1

1. The role of accounting information in management decision making 2
2. Cost concepts, behaviour and estimation 25
3. A costing framework and cost allocation 62
4. Cost–volume–profit (CVP) analysis 105
5. Planning — budgeting and behaviour 141
6. Operational budgets 166
7. Job costing systems 208
8. Process costing systems 237
9. Absorption and variable costing 269
10. Flexible budgets, standard costs and variance analysis 296
11. Variance analysis: revenue and cost 318
12. Activity analysis: costing and management 359
13. Relevant costs for decision making 392

PART 2 Management accounting, extending performance measurement and strategy 441

14. Strategy and control 442
15. Capital budgeting and strategic investment decisions 462
15. Capital budgeting and strategic investment decisions 462
16. The strategic management of costs and revenues 505
17. Strategic management control: a lean perspective 545
18. Responsibility accounting, performance evaluation and transfer pricing 574
19. The balanced scorecard and strategy maps 607
20. Rewards, incentives and risk management 648
21. Sustainability management accounting 673

Index 723

CONTENTS

About the authors xi

Preface xii

PART 1

Management accounting and cost management 1

CHAPTER 1

The role of accounting information in management decision making 2

- 1.1 Management decision making 3
 - Organisational vision 3
 - Organisational core competencies 3
 - Organisational strategies 3
 - Operating plans 4
 - Actual operations 4
 - Measuring, monitoring and motivating performance 4
- 1.2 Cost and management accounting for decision making 4
 - Key influences on management accounting system structure 6
 - Cost and management accounting, yesterday and tomorrow 6
 - Relevant information for decision making 7
- 1.3 Management accounting information and the quality of decision making 8
- 1.4 Value chain analysis: a framework for management accounting 11
 - Cost objects and cost drivers 11
 - The value chain and organisational structure 12
 - Summary 14
 - Key terms 16
 - Self-study problems 17
 - Questions 18
 - Exercises 18
 - Problems 19
 - Endnotes 24
 - Acknowledgements 24

CHAPTER 2

Cost concepts, behaviour and estimation 25

- 2.1 Cost behaviour 26
- 2.2 Variable, fixed and mixed costs 26
 - Relevant range 27
 - Cost functions 28
- 2.3 Cost estimation techniques 29

- Engineered estimate of cost 29
- Analysis at the account level 30
- Graphical technique — scatter plots 30
 - Two-point method 31
 - High-low method 31
- 2.4 Estimating the cost function 32
- 2.5 Regression analysis 35
 - Simple regression analysis 35
 - Interpreting simple regression results 35
- 2.6 Uses and limitations of cost estimates 41
 - Information quality 41
 - Average costs 41
 - Quality of estimation techniques 42
 - Reliance on cost estimates 43
 - Data limitations 43
 - Appendix 2A 44
 - Summary 48
 - Key terms 50
 - Self-study problems 50
 - Questions 52
 - Exercises 52
 - Problems 54
 - Acknowledgements 61

CHAPTER 3

A costing framework and cost allocation 62

- 3.1 Cost objects — need for cost information 63
- 3.2 Direct and indirect costs 64
 - Direct costs 64
 - Indirect costs 64
- 3.3 Process of indirect cost allocation 65
 - Cost drivers 65
 - Determining the allocation rate 66
- 3.4 A costing framework 67
- 3.5 Applying the costing framework in a service entity setting 67
- 3.6 Applying the costing framework in a support department setting 71
 - Allocation methods 71
 - Comparing the direct, step-down and reciprocal methods 79
- 3.7 Limitations of cost allocation data 79
 - Appendix 3A 80
 - Appendix 3B 84
 - Summary 85
 - Key terms 87
 - Self-study problems 87
 - Questions 91
 - Exercises 92
 - Problems 96
 - Acknowledgements 104

CHAPTER 4

Cost–volume–profit (CVP) analysis 105

- 4.1 Cost–volume–profit (CVP) analysis 106
 - Profit equation and contribution margin 106
- 4.2 Breakeven point 106
- 4.3 CVP analysis for a single product 107
 - Calculating breakeven in units and total revenue 107
 - Achieving a targeted pre-tax profit 108
 - Looking at after-tax profit 108
 - Cost–volume–profit (CVP) graph 108
- 4.4 CVP analysis for multiple products 109
 - Discretionary expenditure decision 111
- 4.5 Assumptions and limitations of CVP analysis 111
- 4.6 Margin of safety and degree of operating leverage 111
 - Margin of safety 111
 - Degree of operating leverage 112
 - Appendix 4A 117
 - Summary 120
 - Key terms 122
 - Self-study problems 122
 - Questions 126
 - Exercises 126
 - Problems 133
 - Acknowledgements 140

CHAPTER 5

Planning — budgeting and behaviour 141

- 5.1 The role of planning and budgeting for improved performance and value creation: testing alternative actions 142
- 5.2 Impact of likely actions on profit, assets and cash flow management 142
 - Sales/revenue estimation 142
 - Operating expenses 144
 - New investment 144
 - The operating cycle 144
- 5.3 Planning in cost centres 147
- 5.4 Contemporary approaches to budgeting 148
 - Program budgeting 148
 - Zero-based budgeting 149
 - Rolling budgeting 149
 - Activity-based budgeting 150
 - Kaizen budgeting 150
- 5.5 The behavioural implications of budgeting 150
- 5.6 Beyond Budgeting 152
 - Beyond Budgeting in practice: managing without budgets 153
 - Summary 155
 - Key terms 155
 - Self-study problems 156

- Questions 156
- Exercises 157
- Problems 159
- Endnotes 165
- Acknowledgements 165

CHAPTER 6

Operational budgets 166

- 6.1 Budgeting — a tool for short- and long-term planning 167
 - Budget cycle 167
- 6.2 The role of the master budget 168
 - Developing a master budget 168
 - Budgeting in non-manufacturing entities 173
- 6.3 Developing a cash budget 174
 - Operating cash receipts and disbursements 174
 - Other planned cash flows 174
 - Short-term borrowing or investing 174
- 6.4 Budgets as performance benchmarks 177
 - Budget variances and uncertainties 177
 - Static and flexible budgets 177
- 6.5 Budgets, incentives and rewards 179
 - Participative budgeting 180
 - Budget manipulation 180
 - Budget responsibility 180
 - Budget and variance adjustments to measure performance 181
 - Appendix 6A 183
 - Summary 188
 - Key terms 191
 - Self-study problems 192
 - Questions 196
 - Exercises 197
 - Problems 201
 - Acknowledgements 207

CHAPTER 7

Job costing systems 208

- 7.1 The flow of costs through the manufacturing process 209
- 7.2 Calculating the inventoriable product cost for customised products 210
 - Computerised and manual job costing systems 212
- 7.3 Allocating manufacturing overhead 212
 - Identify the relevant cost object 212
 - Identify one or more overhead cost pools and allocation bases 212
 - For each overhead cost pool, calculate an overhead allocation rate 213
 - For each overhead cost pool, allocate costs to the cost object 214
 - Overapplied and underapplied overhead 214
 - Recording transactions in the financial accounting system 216

- 7.4 Spoilage, rework and scrap in job costing 219
 - Normal and abnormal spoilage 219
 - Rework 221
 - Scrap 221
 - Spoilage opportunity costs 221
- 7.5 Uses and limitations of job cost information 222
 - Uncertainties in measuring job costs 222
 - Uncertainties in estimating future job costs 222
 - Summary 224
 - Key terms 225
 - Self-study problems 226
 - Questions 228
 - Exercises 229
 - Problems 232
 - Acknowledgements 236

CHAPTER 8

Process costing systems 237

- 8.1 Accounting for the cost of mass-produced goods 238
 - Assigning direct materials and conversion costs 238
- 8.2 Work in process and equivalent units 238
- 8.3 Process costing methods 240
 - Process cost reports without beginning or ending WIP — first month (March) 241
 - Process cost reports with ending WIP — second month (April) 243
 - Process cost reports with beginning and ending WIP — third month (May) 244
- 8.4 Journal entries for process costing 246
- 8.5 Production costs and multiple production departments 247
 - Transferred-in costs and timing of direct materials 247
- 8.6 Accounting for spoilage in process costing 250
- 8.7 Uses and limitations of process costing information 252
 - Monitoring process quality and costs 253
 - Process costing information and decision making 253
 - Uncertainties and mismeasurement of cost flows 253
 - Work in process units at different stages of completion 253
 - Hybrid costing systems and operation costing 254
 - Appendix 8A 255
 - Summary 256
 - Key terms 257
 - Self-study problems 258
 - Questions 260
 - Exercises 261
 - Problems 262
 - Acknowledgements 268

CHAPTER 9

Absorption and variable costing 269

- 9.1 Different measures of cost for different purposes 270
 - Absorption costing and variable costing 270
 - Absorption costing 270
 - Variable costing 271
 - Absorption costing compared to variable costing 272
 - Reconciling absorption and variable costing incomes 274
 - Incentives to build up inventories 276
 - Disincentives to build up inventories 276
 - Uncertainties about desirable inventory levels 276
- 9.2 A closer look at absorption costing using normal costing 277
 - Motivation for normal costing 277
 - Allocation rate denominator considerations 278
 - Volume variance with normal costing 278
 - Evaluating denominator choices 278
- 9.3 Comparison of absorption and variable costing 279
 - Summary 283
 - Key terms 284
 - Self-study problems 284
 - Questions 288
 - Exercises 289
 - Problems 291
 - Acknowledgements 295

CHAPTER 10

Flexible budgets, standard costs and variance analysis 296

- 10.1 Flexible budgets 297
- 10.2 Standard costs 297
 - Developing standard costs 297
- 10.3 Variance analysis 298
 - Price variances 299
 - Efficiency variances 299
 - Deciding which variances to investigate 300
 - Analysing interactions between incentives and variances 300
- 10.4 Flexible budgeting in practice 301
 - Manager conclusions and actions 303
 - Summary 308
 - Key terms 309
 - Self-study problems 309
 - Questions 311
 - Exercises 311
 - Problems 313
 - Acknowledgements 317

CHAPTER 11

Variance analysis: revenue and cost 318

- 11.1 Identifying variances 319
- 11.2 Profit- and revenue-related variances 320
 - Profit variance 320
 - Revenue variance 320
 - Sales price and sales quantity variances 321
 - Sales volume and profit variance 321
- 11.3 Direct cost variances 325
 - Direct materials price variance 326
 - Direct materials efficiency variance 327
 - Summary of direct material variances 327
 - Direct labour price variance 327
 - Direct labour efficiency variance 327
 - Summary of direct labour variances 328
 - Journal entries for direct costs and variances 328
- 11.4 Analysing direct cost variance information 328
 - Identifying reasons for direct cost variances 328
- 11.5 Overhead variances 330
 - Variable overhead spending variance 331
 - Variable overhead efficiency variance 332
 - Fixed overhead spending variance 333
 - Production volume variance 333
 - Summary of overhead variances 334
 - Journal entries for overhead costs and variances 334
- 11.6 Using overhead variance information 334
 - Analysing overhead spending variances 334
 - Interpreting the variable overhead efficiency variance 335
 - Interpreting the production volume variance 336
- 11.7 Cost variance adjustments in the general ledger 337
 - Summary 343
 - Key terms 345
 - Self-study problems 346
 - Questions 349
 - Exercises 349
 - Problems 353
 - Acknowledgements 358

CHAPTER 12

Activity analysis: costing and management 359

- 12.1 Activity-based costing (ABC) and conventional costing 360
 - Conventional cost accounting systems 360
 - Activity-based costing systems 361

- 12.2 ABC cost hierarchy 362
 - Organisation-sustaining activities 363
 - Facility-sustaining activities 363
 - Customer-sustaining activities 363
 - Product-sustaining activities 363
 - Batch-level activities 363
 - Unit-level activities 363
- 12.3 Understanding and implementing an ABC model 364
- 12.4 Activity-based management (ABM) 367
 - Managing customer profitability 367
 - Managing product and process design 367
 - Managing environmental costs 368
 - Managing constrained resources 368
 - Managing resources supplied and consumed 368
- 12.5 Benefits, costs and issues related to ABC 369
 - Benefits of ABC 369
 - Costs of ABC 369
 - Issues related to ABC 370
 - Summary 378
 - Key terms 379
 - Self-study problems 379
 - Questions 381
 - Exercises 382
 - Problems 387
 - Endnotes 390
 - Acknowledgements 391

CHAPTER 13

Relevant costs for decision making 392

- 13.1 Non-routine operating decisions 393
- 13.2 Special orders 394
 - General rule for special order decisions 394
- 13.3 Product line and business segment (keep or drop) decisions 397
 - General rule for keep or drop decisions 397
- 13.4 Insource or outsource (make or buy) decisions 399
 - General rule for make or buy decisions 399
- 13.5 Constrained resources 400
 - General rule for choosing the product mix when resources are constrained 401
 - General rule for relaxing constraints for one or two products 401
- 13.6 Qualitative factors important to non-routine operating decisions 402
 - Quality of decision process 404
- 13.7 Joint products and costs 404
 - Allocating joint costs 405
 - Choosing an appropriate joint cost allocation method 408
 - Pros and cons of alternative allocation methods 409

- Processing a joint product beyond the split-off point 410
- Uncertainty and bias in incremental revenue and cost estimates 411
- Joint products and by-products 411
- Joint product costing with a sales mix 413
- Uses and limitations of joint cost information 416
- Summary 417
- Key terms 420
- Self-study problems 420
- Questions 424
- Exercises 424
- Problems 432
- Acknowledgements 440

PART 2

Management accounting, extending performance measurement and strategy 441

CHAPTER 14

Strategy and control 442

- 14.1 Management accounting and control in a ‘flat world’ 443
- 14.2 Introduction to strategy and control 444
- 14.3 Frameworks for strategy and control 446
 - Ferreira and Otley’s performance management systems framework 446
 - Simons’ levers of control framework 448
 - Kaplan and Norton’s strategy map framework 449
 - Ittner and Larcker’s value-based management framework 450
 - Flamholtz’s control system framework 451
- 14.4 Management responsibility and accountability practices 453
 - Summary 456
 - Key terms 456
 - Self-study problems 456
 - Questions 457
 - Exercises 457
 - Problems 459
 - Endnotes 460
 - Acknowledgements 460

CHAPTER 15

Capital budgeting and strategic investment decisions 462

- 15.1 Capital investment decisions 463
 - Capital budgeting 463
 - Decision alternatives 463

- 15.2 Relevant cash flows 464
- 15.3 Net present value (NPV) method 465
 - Present value of a series of cash flows 465
 - Net present value of a project 466
 - Identifying a reasonable discount rate 467
- 15.4 Uncertainties and sensitivity analysis 467
 - Cash flow uncertainties 467
 - Project life and discount rate uncertainties 468
 - Estimation bias 468
 - Sensitivity analysis 468
- 15.5 Alternative methods used for capital investment decisions 470
 - Internal rate of return 470
 - Comparison of NPV and IRR methods 471
 - Payback method 471
 - Accrual accounting rate of return method 472
- 15.6 Strategic considerations for investment decisions 472
 - The type of information required in decision making 472
 - Moving baseline concept 473
 - Project champion 473
 - Cost of reversing the decision 473
 - Reputation, risks, environment, quality and community 474
 - Making and monitoring investment decisions 477
- 15.7 Income taxes and the net present value method 478
 - Calculating incremental tax cash flows 478
- 15.8 Inflation and the net present value method 479
 - Real and nominal methods for NPV analysis 479
 - Appendix 15A 481
 - Summary 489
 - Key terms 490
 - Self-study problems 491
 - Questions 494
 - Exercises 494
 - Problems 498
 - Endnotes 504
 - Acknowledgements 504

CHAPTER 16

The strategic management of costs and revenues 505

- 16.1 Value chain activities for continuous cost improvement 506
 - Value chain and supply chain analysis 506
- 16.2 Customer profitability 509
- 16.3 Building desired profit into decisions 514
 - Target costing 515
- 16.4 Kaizen costing 519
 - Using target and kaizen costing over time 522
- 16.5 Life cycle costing 522

16.6 Price management: pricing methods 523
 Cost-based pricing 523
 Market-based pricing 525
 Cost-based versus market-based pricing 527
 Other influences on price 528
 Pricing in not-for-profit entities 528
 Government regulations, ethics and pricing 529
 Summary 530
 Key terms 532
 Self-study problems 533
 Questions 534
 Exercises 535
 Problems 539
 Endnotes 544
 Acknowledgements 545

CHAPTER 17

Strategic management control: a lean perspective 546

17.1 Lean thinking philosophy 547
 17.2 Theory of constraints 550
 Throughput costing 551
 TOC performance measurement 553
 Benefits and limitations of the theory of constraints and throughput costing 553
 17.3 Just-in-time (JIT) production 557
 17.4 Total quality management (TQM): managing quality 559
 Value chain approach to quality management 560
 Summary 563
 Key terms 564
 Self-study problems 564
 Questions 565
 Exercises 566
 Problems 571
 Endnotes 572
 Acknowledgements 573

CHAPTER 18

Responsibility accounting, performance evaluation and transfer pricing 574

18.1 Decision-making authority and responsibility 575
 Centralised and decentralised entities 575
 General versus specific knowledge 576
 Technology and globalisation 577
 18.2 Responsibility accounting 577
 Cost centres 578
 Revenue centres 578
 Profit centres 579

Investment centres 579
 Responsibility centres and suboptimal decision making 579
 18.3 Income-based performance evaluation 579
 Return on investment 580
 Advantages and disadvantages of ROI 582
 Residual income 583
 Advantages and disadvantages of residual income 584
 Economic value added 584
 Advantages and disadvantages of EVA 585
 Income-based performance evaluation in the public sector 586
 18.4 Transfer pricing 586
 Transfer prices and conflicts among managers 587
 Setting an appropriate transfer price 588
 18.5 Additional transfer price considerations 592
 International income taxes 592
 Transfer prices for support services 592
 Setting transfer prices for internal services 593
 Transfer of corporate overhead costs 593
 Summary 594
 Key terms 595
 Self-study problems 596
 Questions 597
 Exercises 598
 Problems 601
 Endnotes 605
 Acknowledgements 606

CHAPTER 19

The balanced scorecard and strategy maps 607

19.1 Measuring organisational performance 608
 Financial and non-financial measures 608
 19.2 Strategy maps 612
 19.3 The balanced scorecard 614
 Financial perspective and related measures 615
 Customer perspective and related measures 615
 Internal business process perspective and related measures 615
 Learning and growth perspective and related measures 617
 Role of social media performance measures 620
 Using the balanced scorecard diagnostically or interactively (levers of control) 621
 Belief systems, boundary systems and the balanced scorecard 622
 19.4 Steps in implementing a balanced scorecard 622
 Clarify vision, core competencies and strategies 623

Analyse perspectives to develop performance objectives and measures 623

Construct a strategy map to reinforce links between measures 623

Communicate, link throughout the organisation and refine 623

Establish performance targets and action plans 624

Collect and analyse scorecard data to monitor performance 624

Investigate variances and reward employees 624

Provide feedback and refine the balanced scorecard 624

19.5 Strengths and weaknesses of the balanced scorecard 628

Strengths 628

Weaknesses 628

How valuable is the balanced scorecard? 630

Summary 632

Key terms 634

Self-study problems 635

Questions 637

Exercises 637

Problems 641

Endnotes 647

Acknowledgements 647

CHAPTER 20

Rewards, incentives and risk management 648

20.1 Agency theory and rewards 649

Agency costs 649

Rewards 650

20.2 The structure of reward systems 650

20.3 Forms of incentives 651

Types of equity incentives 652

20.4 Structuring reward systems containing incentives 652

20.5 Emerging themes in reward systems 656

Relative performance evaluation 656

Pay-for-performance issues 656

Regulation and government intervention 657

Connecting the incentive to performance metrics 658

20.6 Risk management 658

Risk management and compliance 659

The integrated approach to risk management 659

Risk management principles — summary 660

Incentives, rewards and risk management 661

Effective risk management architecture 662

Summary 664

Key terms 665

Self-study problems 665

Questions 667

Exercises 667

Problems 670

Endnotes 677

Acknowledgements 678

CHAPTER 21

Sustainability management accounting 679

21.1 Sustainability and management accounting 680

Sustainability and United Nations Sustainable Development Goals 680

Sustainability management 684

Managing natural capital with carbon footprint accounting 685

Sustainability management accounting 687

21.2 Sustainability, ethics and integrated thinking 690

21.3 Scope and benefits of sustainability management accounting 693

Sustainability scope considerations 693

Management decisions benefiting from sustainability management accounting 694

21.4 Sustainability management accounting tools 696

Sustainability value chain analysis 697

Sustainability cost allocation and full cost accounting 697

Sustainability life cycle costing 699

Sustainability and capital budgeting 700

Sustainability balanced scorecard 703

21.5 Sustainability management accounting — issues relating to successful integration 704

Summary 707

Key terms 709

Self-study problems 709

Questions 710

Exercises 711

Problems 712

Endnotes 720

Acknowledgements 722
