

TABLE OF CONTENTS

Chapter		Paragraph
1	Introduction and Background	.01-.75
	Introduction01-.09
	Intended Users of a SOC for Supply Chain Report10-.16
	Overview of a SOC for Supply Chain Examination17-.19
	Contents of the SOC for Supply Chain Report20-.21
	Defining the System to Be Examined22-.34
	The Entity's System Objectives and Principal System Objectives27-.28
	Selecting the Trust Services Category or Categories to Be Addressed by the Examination29-.33
	Determining the Time Frame for the Examination34
	Other Engagement Considerations35-.41
	Considerations for Entities That Distribute Products35-.38
	Considerations for Entities That Bundle Services With Their Products39-.40
	Considerations for a Design-Only Examination41
	Matters Not Addressed by a SOC for Supply Chain Examination42-.43
	Criteria for a SOC for Supply Chain Examination44-.62
	Description Criteria45-.47
	Trust Services Criteria48-.58
	Evaluating the Entity's Principal System Objectives59-.62
	The Practitioner's Opinion in a SOC for Supply Chain Examination63-.65
	Other Types of SOC Examinations: SOC Suite of Services66
	Professional Standards67-.74
	Attestation Standards68-.70
	Code of Professional Conduct71
	Quality in the SOC for Supply Chain Examination72-.74
	Definitions75
2	Accepting and Planning a SOC for Supply Chain Examination	.01-.154
	Introduction01-.02
	Understanding Entity Management's Responsibilities03-.10
	Entity Management's Responsibilities Prior to Engaging the Practitioner04-.07
	Entity Management's Responsibilities During the Examination08-.09
	Entity Management's Responsibilities During Engagement Completion10
	Responsibilities of the Practitioner11
	Engagement Acceptance and Continuance12-.15
	Independence16-.19

Chapter		Paragraph
2	Accepting and Planning a SOC for Supply Chain Examination — continued	
	Competence of Engagement Team Members20-.24
	Preconditions of the Engagement25-.49
	Determining the Appropriateness of the Subject Matter26-.27
	Identifying the Components of the System to be Examined28-.30
	Determining the Boundaries of the System Being Examined31-.38
	Determining Whether Entity Management Is Likely to Have a Reasonable Basis for Its Assertion39-.43
	Assessing the Suitability and Availability of Criteria44
	Determining Whether the Entity’s Principal System Objectives Are Reasonable in the Circumstances45-.49
	Requesting a Written Assertion and Representations From Entity Management50-.54
	Agreeing on the Terms of the Engagement55-.64
	Accepting a Change in the Terms of the Examination60-.64
	Establishing an Overall Examination Strategy for and Planning the Examination65-.69
	Performing Risk Assessment Procedures70-.106
	Obtaining an Understanding of the Description of the Entity’s System and Control Effectiveness71-.83
	Assessing the Risks of Material Misstatement84-.95
	Considering Materiality During Planning96-.106
	Considering Entity-Level Controls107-.111
	Understanding the Internal Audit Function112-.119
	Planning to Use the Work of a Practitioner’s Specialist120-.126
	Identifying Customer Responsibilities and Complementary Customer Controls127-.133
	Identifying Suppliers and Complementary Supplier Controls134-.150
	Suppliers Whose Controls Are Necessary for the Entity to Achieve Its Principal System Objectives134-.135
	Complementary Supplier Controls136-.141
	Using the Inclusive Method142-.150
	Planning to Use the Work of an Other Practitioner151-.154
3	Performing the SOC for Supply Chain Examination	.01-.199
	Introduction01
	Designing Overall Responses to the Risk Assessment02-.03
	Designing and Performing Procedures04
	Obtaining Evidence About Whether the Description Presents the System That Was Designed and Implemented in Accordance With the Description Criteria05-.59
	Disclosures Related to the Types of Goods Produced, Manufactured, or Distributed17-.18

Chapter		Paragraph
3	Performing the SOC for Supply Chain Examination — continued	
	Disclosures About the Entity’s Principal System Objectives19-.24
	Disclosures About System Incidents25-.28
	Disclosures About Risks That May Have a Significant Effect on the Entity’s Production, Manufacturing, or Distribution29-.30
	Disclosures About Inputs to and Components of the System31-.32
	Disclosures About Individual Controls and the Applicable Trust Services Criteria33-.41
	Disclosures About Complementary Customer Controls42-.43
	Disclosures Related to Complementary Supplier Controls44-.56
	Disclosures About Nonrelevant Criteria57
	Disclosures About Significant Changes to the System During the Period58-.59
	Evaluating Description Misstatements Identified During the Examination60-.67
	Considering Whether the Description Is Misstated or Otherwise Misleading68-.69
	Obtaining Evidence About the Suitability of the Design of Controls70-.85
	Multiple Controls Are Necessary to Address an Applicable Trust Services Criterion77-.78
	More Than One Control Addresses a Particular Risk79
	Procedures to Obtain Evidence About the Suitability of Design of Controls80-.85
	Evaluating Deficiencies in the Suitability of Design of Controls86-.88
	Obtaining Evidence About the Operating Effectiveness of Controls89-.94
	Designing and Performing Tests of Controls91-.94
	Nature of Tests of Controls95-.110
	Testing Review Controls101-.102
	Evaluating the Reliability of Information Produced by the Entity103-.110
	Timing of Tests of Controls111-.112
	Extent of Tests of Controls113-.118
	Testing Superseded Controls119-.120
	Using Sampling to Select Items to Be Tested121-.125
	Selecting Items to Be Tested124-.125
	Additional Risk Considerations Related to Suppliers and Business Partners126-.136
	Controls That Suppliers Expect the Entity to Implement126-.131
	Entity Controls for Addressing Supplier Risks132-.133
	Complementary Supplier Controls134-.136

Chapter		Paragraph
3	Performing the SOC for Supply Chain Examination — continued	
	Considering Controls That Did Not Need to Operate During the Period Covered by the Examination137
	Identifying and Evaluating Deviations in the Effectiveness of Controls138-.142
	Materiality Considerations When Evaluating Deficiencies in the Effectiveness of Controls143-.146
	Using the Work of the Internal Audit Function147-.153
	Using the Work of a Practitioner’s Specialist154-.157
	Revising the Risk Assessment158-.162
	Evaluating the Sufficiency and Appropriateness of Evidence159-.160
	Evaluating the Results of Procedures161-.162
	Responding to and Communicating Known and Suspected Fraud, Noncompliance With Laws or Regulations, Uncorrected Misstatements, and Deficiencies in the Effectiveness of Controls163-.169
	Known or Suspected Fraud or Noncompliance With Laws or Regulations163-.165
	Communicating Incidents of Known or Suspected Fraud, Noncompliance With Laws or Regulations, Uncorrected Misstatements, or Internal Control Deficiencies166-.169
	Obtaining Written Representations170-.183
	Requested Written Representations Not Provided or Not Reliable180-.181
	Engaging Party Is Not the Responsible Party182
	Representations From the Engaging Party When It Is Not the Responsible Party183
	Subsequent Events and Subsequently Discovered Facts184-.191
	Subsequent Events Unlikely to Have an Effect on the Practitioner’s Report191
	Documentation192-.196
	Considering Whether Entity Management Should Modify Its Assertion197-.199
4	Forming the Opinion and Preparing the Practitioner’s Report	.01-.91
	Responsibilities of the Practitioner01-.05
	Forming the Practitioner’s Opinion06-.15
	Concluding on the Sufficiency and Appropriateness of Evidence08-.13
	Expressing an Opinion on Each of the Subject Matters in the SOC for Supply Chain Examination14-.15
	Describing Tests of Controls and Results of Tests in the Practitioner’s Report16-.28
	Describing Tests of Controls and Results When Using the Internal Audit Function24-.26

Chapter		Paragraph
4	Forming the Opinion and Preparing the Practitioner's Report — continued	
	Describing Tests of the Reliability of Information Produced by the Entity27-.28
	Preparing the Practitioner's SOC for Supply Chain Report29-40
	Elements of the Practitioner's Report29
	Restricting the Use of the Practitioner's Report30-31
	Reporting When There Are Complementary Customer Controls32-.35
	Reporting When There Are Complementary Supplier Controls36-40
	Reporting When the Practitioner Assumes Responsibility for the Work of an Other Practitioner41
	Modifications to the Practitioner's Opinion42-67
	Qualified Opinion50-51
	Adverse Opinion52-56
	Scope Limitation57-61
	Disclaimer of Opinion62-67
	Report Paragraphs Describing the Matter Giving Rise to the Modification68-76
	Illustrative Separate Paragraphs When There Are Material Misstatements in the Description68-73
	Illustrative Separate Paragraph: Material Deficiencies in the Effectiveness of Controls74-76
	Other Matters Related to the Practitioner's Report77-80
	Emphasis-of-Matter Paragraphs and Other-Matter Paragraphs77-78
	Distribution of the Report by Management79-80
	Practitioner's Recommendations for Improving Controls81
	Other Information Not Covered by the Practitioner's Report82-86
	Illustrative Report87-88
	Preparing a SOC for Supply Chain Report in a Design-Only Examination89-91
Supplement		
A	2020 Description Criteria for a Description of an Entity's Production, Manufacturing, or Distribution System in a SOC for Supply Chain Report	
B	2017 Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy	
Appendix		
A	Information for Entity Management	
B	Comparison of SOC for Supply Chain, SOC 2®, and SOC for Cybersecurity Examinations and Related Reports	

C	Illustrative Management Assertion in a SOC for Supply Chain Examination
D	Illustrative Accountant's Report for a SOC for Supply Chain Examination
E	Illustrative SOC for Supply Chain Report (Including Entity Management's Assertion, Accountant's Report, and Illustrative Description of the System)
F	Definitions
G	Overview of Statements on Quality Control Standards
	Index of Pronouncements and Other Technical Guidance
	Subject Index
